Total Turnkey Website Solution

Manage your own eBusiness Website that can help you increase your business and save you money!

By establishing your presence on the World Wide Web with a WebCenter, you can use your Website to promote your company and products, sell merchandise and services, gather marketing data, conduct online proactive marketing, expand your community of interest and communicate vital information. More importantly to small business owners, you can do this yourself for a low fixed cost and have access to unlimited support.

For ten years, **interPak Internet Solutions**[™] has been helping businesses and organizations of all sizes to maximize their investment in online strategic marketing. Now, interPak has partnered with another ten-year-old company to provide robust Website capabilities to small and midrange businesses through the **WebCenter**.

This enables a business of any size to make an easy and cost-effective transition to a global **eBusiness marketing strategy**.

Our mission is to provide a complete eBusiness solution to small and midrange businesses and organizations. interPak strives to provide a solid Web-based marketing platform to provide our clients with a total turnkey software solution, rich in eCommerce and proactive marketing capabilities, and supported by excellent customer service.

Come to our Website and learn more about how interPak might assist you in your overall eBusiness and marketing strategy...
